

Calling all Secondary School Students

Work as part of a team and discover what it is like to be a business and tech pro.

Explore career possibilities by taking part in the DiversITy-talent challenge to solve a business, community or youth challenge, using the very latest technologies and techniques

With thanks to our funding and certification partners:

Coforge

nationwide

New College
SWINDON

BCS

CIONET

Modern business and tech is not just about coding and computers

Your career can be creative, full of possibilities and well paid

You don't need to study ICT or have a STEM degree to get involved the competition. In fact, we'll show you how easy it is to be and do what you want in the future

Taking part in this team challenge counts towards your work experience hours and enrichment activities

Enter a team into the DiversITy-talent Awards competition and solve a challenge in your community, school or town through our 30-hour experience, split weekly to suit your timetabling.

Receive an accredited certificate to add to your CV!

- You will receive an accredited certificate and digital badge at the end of the competition, recognised by business and superb for your CV
- A winning solution can win money for your school to invest in tech-related tools and experiences
- You will have access to cutting edge technologies and tools which will strengthen your solution as you work through your team's challenge

How to get involved

Registration is open now for a chance to join our secondary schools' finalists in July next year at a special venue.

Work with your teachers to create diverse teams of up to 16 participants together (50/50 gender split where possible) and sign them up through the link below.

You can run the DiversITy-talent challenge with a full year group if preferred, split into smaller teams of 12 or less. This can be discussed with our team.

Our trained facilitators will work with you and your pupils to make the challenge fun, rewarding and creative, as they learn new skills from problem solving to teamwork, collaboration, communication, presentation skills and more. All DiversITy-talent representatives are Enhanced DBS certified.

Each team taking part will be given workbooks and other resources to help turn their ideas into reality.
